

# CORENTIN GIAUFER-SAUBERT

## Backend Developer

contact@corentings.dev • <https://corentings.dev> • Nice, FR

### Summary

I've been working as a Golang backend developer for over three years. During this time, I've successfully built robust backend systems and collaborated with clients to realize their visions. I'm actively involved in open-source projects, demonstrating my commitment to teamwork and continuous professional growth.

### Experience

#### TFD Recrutement

Nice, FR

##### Freelance Project Manager & Backend Developer

12/2022 - 09/2023

Successfully led and delivered a complex backend project from concept to production. Streamlined workflows and improved resource allocation and timeline management, resulting in significantly enhanced project delivery efficiency.

- Enhanced system performance by optimizing database queries.
- Designed and implemented a scalable architecture in Golang.
- Managed a team of 3 developers, fostering a collaborative environment and setting clear goals. This approach demonstrably boosted team productivity.
- Established strong client relationships as the primary contact point. Proactively addressed concerns and delivered regular progress updates, exceeding client expectations.

#### ONE-TOO / CONTACT-AZUR

Carros, FR

##### Internship

07/2021 - 07/2021

Collaborated with the embedded systems team, contributing to project management and software development.

- Enhanced user experience by designing a user-friendly C++/QT graphical interface for embedded system control.
- Developed and contributed C code for the embedded system's networking protocol, ensuring efficient and reliable operation.
- Created comprehensive documentation detailing project architecture, Agile methodology, design choices, and technical specifications.

### Education

#### IU Internationale Hochschule

Remote

##### Computer Science

2022 - Present

#### Université Côte d'Azur

Nice, FR

 Aeronautics

## Projects

### Chess Bet

04/2024 - Present

Chessbet is a unique project developing a platform for chess betting based on the Lichess broadcast API. This platform will allow users to bet on their favorite players. The project is currently in the development phase.

### Memnix

10/2021 - 01/2023

Open-source flashcards app designed to enhance learning using spaced repetition algorithms.

### UCA timetable

2022

This project aimed to provide a user-friendly web and mobile application enabling UCA students to generate, view, and export their timetables effortlessly.

## Volunteering

### Echiquier Nicois

Board Member

01/2024 - Present

Led a comprehensive club reconstruction, overseeing website development and financial restructuring (e.g., cost reduction).

### Chess.com

Twitch Moderator

05/2023 - Present

Moderator of the twitch chess.com French channel.

## My Life Philosophy

"Some part of a mistake is always correct"

— [Savielly Tartakover](#)
